Ms. Strength,

I am strongly opposed to the proposed route for the CapX2020 transmission lines.

This would make a very dangerous situation for my flying neighbors and myself as the towers would be constructed only a half mile away from our runway and directly in the traffic pattern.

We all moved to this airpark community because of our love of aviation. This proposed route would cause a huge devalue of our homes as well.

Please reconsider the problems this would cause to our wonderful community.
